

## YVFC to dedicate new ambulance

The Youngstown Volunteer Fire Co. invites the River Region community to attend the dedication of its new ambulance, at noon, Saturday, Dec. 9, at the Youngstown Village Center. This event will be part of the "Christmas in the Village" celebration.

"Our community's generous support made this accomplishment possible. Please join us on Dec. 9," said Michelle Clark Robinson of Youngstown Volunteer Fire Co., president of the Niagara County Volunteer Firemen's Association.

The Rev. Bob Hagel will lead the dedication.

### Youngstown Lions Club decorating contest

Residents and businesses in Youngstown are encouraged to light up their decorations on the evening of Dec. 15, to enter the annual holiday decorating contest sponsored by the Youngstown Lions Club. Judging will take place that evening; winners are limited to once every three years. Prizes for decorated homes will include first (\$100), second (\$75) and third (\$50), with a special prize (\$50) for a business.

For more information, contact Lion John Rolfe at 716-745-3564.

# SHE GAVE ME MY LIFE BACK

**A local clinic has a modern medical solution to treat your Peripheral Neuropathy and is having incredible results!**

"It started out as a normal outing. My wife and I had to run to the grocery store. We were driving down the road, going over our shopping list, when the car ahead of me started to slow down anticipating the yellow light. I started to move my foot from the gas to the break, like I normally would, but I couldn't. I couldn't feel my foot! The car kept moving and I couldn't get my foot on the brake in time. I finally came to a stop when I hit the car in front of me."

This tragic story was shared with us by Tony, a Medina resident who has Peripheral Neuropathy. While no one was hurt in the accident, Tony had suffered almost every day of his life with tingling and burning in his feet, until numbness set in and he could no longer feel even the brake pedal beneath his foot.

"The first stage is pain," shares Stacey of Stacey Austin Acupuncture in Lockport. "You feel tingling, burning, and sharp pains, or you feel like your feet are swollen and you are walking on marbles. This pain eventually subsides and the numbness sets in. Unfortunately, the numbness brings with it a whole other set of problems." This was the case with Tony.

It is terribly common that Peripheral Neuropathy and its debilitating symptoms interfere with a person's ability to live their life. Tony was now reliant on his wife to drive him around, even the simple pleasure of cruising down Route 31 to take her out to dinner was outside his capabilities. Even more common, Tony's primary care doctor and several specialists told him that there was nothing that they could do other than prescribe him pills that MIGHT ease the pain.

That's where Stacey and her staff come in. "A large percentage of our current patients come to us suffering from the same condition as Mr. Tony," says Judy, a clinic assistant.

"They are in constant pain from neuropathy and it prevents them from living and enjoying their life. Depending on the severity of their nerve damage, we typically see tremendous progress in 3 – 5 months of treatment. I like to say that we're often the last resort with the best results!"

"I can't lie," confides Tony. "I was skeptical at first. My doctors were telling me that I would just have to live with it, there was nothing that could be done; and then there is a practitioner right here in Lockport that was telling me that she can help. Turns out she was right! About three months after beginning treatment, I was able to confidently drive myself to my appointments! My wife and I celebrated by buying ourselves a new car! It's hard to put into words how incredible this is, quite frankly [Stacey] gave me my life back."

While Stacey specializes in acupuncture and it is a part of her protocols in treating neuropathy, the real secret is in a modern medical solution called ATP Resonance BioTherapy™. "This technology was originally developed by NASA to expedite healing and recovery," shares Stacey. "It's like watering a plant, it stimulates the tiny blood vessels to grow back around the peripheral nerves and provide them with the proper nutrients to heal and repair."

You can learn more about Stacey and her practice by visiting [staceyaustinacu.com](http://staceyaustinacu.com). If you are ready to schedule a consultation, call 716-628-3802 and do so quickly. Her clinic is very intimate, and the staff takes pride in their ability to take their time with each patient so they are limited in their ability to take on new patients through the end of the year.
